## Disclaimer

This review has been conducted to the best of our knowledge, it strictly checks for disparities bewteen the project's contracts and that of Tomb.

In no way, shape or form is WhatTheFork attempting to promote the project neither is WhatTheFork suggesting finanical success by participating in it.

**Mario** (0x915B96165A3b78dFE96D35D6DE200d849C9A3314)

Mario's contract includes a sell fee:

- The sell fee can be toggled on and off via the `setTakeFee` function.
  - It can be modified via the `setSellFeePercentage` function, restricted to a maximum of 20%.

Operator and owner status:

Luiqi (0x8A164cDf4305f04800f73A2592Fd0366a553650a)

Mario's contract includes a sell fee:

- The sell fee can be toggled on and off via the `setTakeFee` function.
  - It can be modified via the `setSellFeePercentage` function, restricted to a maximum of 20%.

Operator and owner status:

Note:

The protocol is still yet to commence, the Mario token has not yet been renounced, it is highly recommend to participate in the protocol after the ownership has been transferred to a null address.

This document will automatically get updated when the contract is renounced.

## **Wario** (0x1682760E28d0E67207b3264e81EA10dA0144e0D6)

Wario does not have any disparties from the original TBond contract.

Operator and owner status:

- Operator :Treasury - 0x63a89533057ad6072210bd900ab43f43f3d3161e
- Owner :Deployer - 0x417b61945117216080677499BdF0a92A27E456d7

## **Boardoom** (0x70AbbD53dcFc58A125B8A230c869ffE1d8ECEEcD)

The Boardroom does not have any disparties from the original Tomb Finance Masonry contract.

Operator status:

- Operator :Treasury - 0x63a89533057ad6072210bd900ab43f43f3d3161e

## **Oracle** (0xcd7b726Aa8184e8B6f0920090534ED62B27cf069)

Oracle does not have any disparties from the original Tomb Finance Oracle contract.

Operator and owner status:

- Operator :Treasury - 0x63a89533057ad6072210bd900ab43f43f3d3161e
- Owner\* :Deployer - 0x417b61945117216080677499BdF0a92A27E456d7

\* Epoch periods can be modified to the need of the protocol, although, it can also be used for the contract owner's personal interests.

(This applies to tomb itself and mostly all tomb fork projects.)

## Treasury (0x1021f0E7D8a58e5cAc5ACDB74E69056FC97049a0 )

Mario Finance's treasury does not contain any disparities relative to Tomb Finance's Treasury contract.

Operator status:

Operator :Deployer - 0x417b61945117216080677499BdF0a92A27E456d7

## LuigiRewardPool(0xE2E00ecD952dacC5B8Ac6D3D1C32E1def6e690cd)

The pool does not have any disparities from the original TShareRewardPool contract.

Operator status:

Operator\* :Deployer - 0x417b61945117216080677499BdF0a92A27E456d7

## MarioGenesisRewardPool(0x6922934624D53280fD4be02FE5005e57411aF625)

The genesis pools have a deposit fee, which can be modified and is restricted to be a maximum of 1%.

Operator status:

Operator :Deployer\* - 0x417b61945117216080677499BdF0a92A27E456d7

\*\*The deployer can add new pools, modify existing ones to the needs of the protocol, but, ghost pools can be added for the dev letting the dev farm with a large APR, although applies to a large number of tomb fork projects, along with Tomb itself.

# Report Synopsis

Mario Finance seems to have safe contracts, with most of the contracts being vanilla to Tomb Finance's.

There's a few taxation modifications present in the Mario Token and Luigi Token, a sell fee of maximum 20% can be applied.

MarioGenesisRewardPool has a maximum deposit fee of 1%, there was an issue with a previous version of the contract, WhatTheFork promptly notified the MarioFinance team about the same, and it was quickly fixed.

Few safety tips to keep in mind:

- Always ensure that the contract you're interacting with is the same one as mentioned in the contracts page.
- To check what contract your wallet is interacting with directly, you can find the contract address stated on the transaction screen right in the middle when approving tokens and on the top right while calling other functions.
